Subject: Comment on Microsoft Settlement

I feel strongly that justice has been blinded by the color of commerce. Each day that passes, Microsoft works to strengthen it's monopolistic holds. Monopoly in itself is not illegal, but the practices Microsoft uses to accomplish it's goals are.

This settlement is nothing but a slap in face of those who seek faith in the Department of Justice. Not only is this settlement a far cry from justice, but it furthers the monopoly of Microsoft.

The citizens of the United States rely on the Department of Justice to mete out and preserve justice. Protect the naive and serve the principles of our country.

Choose wisely and be diligent in your duties. You are the arm of the law.

Sincerely,
David
